

Carbon Trading: How the Residential Market Stacks Up

RESNET Building Performance Conference
San Diego, CA
February 18, 2008

The Basis for Savings

- Upstream – “smokestacks and tail pipes”
OR
- Downstream – efficiency and conservation
- Plus same old basic questions . . .
 - Savings compared to what?
 - How is equity achieved?
 - How is good existing infrastructure credited?
 - How is poor existing infrastructure debited?
 - Embodied carbon, operating carbon or both?

eGrid Database: Emissions by State
